DETAILED ACTION

Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Claim Objections

2. Claims 1 & 4 are objected to because of the following informalities:

With respect to claims 1 & 4, the phrase "exposed from" appears improper. The phrase should read "exposed to".

Appropriate correction is required.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,098,864 to Mahulikar in view of US 6,800,508 B2 to Kimura.

With respect to claims 1-2 & 5-6, Mahulikar discloses a device comprising metal layer (22) as an upper metal sheet set, die attach layer (46) and first polymer sealant (16) as an encapsulant, second polymer sealant (38) as a frame layer, base component (12) as a printed circuit board, electronic device (32) as a photosensitive chip, bonds (34) as a plurality of wires, and cover (36) as a transparent layer. However, Mahulikar does not disclose the use of a lower metal sheet set, and an upper and lower middle board. Kimura discloses a semiconductor device comprising such a layer. Kimura discloses a device in which an upper metal sheet set (8a) is stacked on a lower metal sheet set (8c). Kimura also discloses an upper middle board (8b) with a lower middle board (8c). To modify the teachings of Mahulikar with those of Kimura would have been obvious to one of ordinary skill in the art as it would allow for an "external extension as occasion demands" and to allow for ease in heat dissipation (see column 2, lines 30-38).

With respect to claims 3 & 7, the modified Mahulikar disclose and illustrates the polymer sealants (16, 38) to be of an industrial plastic material and to form integrally.

With respect to claim 4, the modified Mahulikar disclose the cover (36) being made of glass (see column 5, lines 43-46).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 5,138,145 to Nakamura et al disclose an image sensor.
